

## High-Wire Act at Global Finals 2025

**Congratulations** to you and your team on your accomplishments this year. We look forward to meeting and working with you at Global Finals 2025! It has been our honor and privilege to serve as your International Challenge Masters for the Engineering Challenge, High-Wire Act. Our goal is to assist your team in having a great experience in Kansas City. To help you prepare for your experience, we'd like to share some information about the Presentation Sites and Prop Storage. **There is a LOT of information in this letter, so please read it carefully, and make sure to find the [Overlooked Requirements of the Challenge Section](#) at the end!**

The Global Finals tournament begins **Friday, May 23 at 8:00 a.m.** and concludes **Sunday, May 25 at noon**. The Closing Celebration will begin at **4:00 p.m. on Sunday at the Municipal Arena**. Please keep checking the Global Finals website for any updates: <http://www.globalfinals.org>.

\*\*Note that due to street closures during the event, GPS will not give accurate driving directions. Please use Destination Imagination maps (<https://www.globalfinals.org/getting-around/>) to navigate to event entrances.

**Donna Robinson (Nebraska) and Crissy Buhr (Wisconsin) will be serving as International Challenge Masters for the Engineering Challenge.**

**There will be two sites for the Engineering Challenge:  
Elementary, Secondary, and University Level Site: 2103C  
Middle Level Site: 2105  
Check-In Area, all levels: 2101**

### Team Manager Videos

Team Manager information videos will be available on our website at <https://www.globalfinals.org/team-manager-info/> prior to the tournament. These videos will NOT be live streamed, so you can watch them at your convenience! The Team Manager of record will receive an email when videos are available. There will be 3 videos for you to watch:

- A general information video for Team Managers, with information and reminders about the overall tournament
- A Challenge-specific video featuring your Team Challenge International Challenge Masters, answering questions from you! Please [fill out this form](#) to submit questions to your Team Challenge ICMs. All questions must be submitted by Sunday, May 4 at 11:59 p.m. Keep in mind that all questions must be “for the good of the group” and not specific to your team’s solution. You may ask questions about site-specific procedures or Challenge interpretations for Global Finals.
- An Instant Challenge video featuring the Instant Challenge International Challenge Masters, answering questions from you! Please [fill out this form](#) to submit questions to the Instant Challenge ICMs. All questions must be submitted by Sunday, May 4 at 11:59 p.m. You may ask questions about Instant Challenge procedures or the sites.

These videos will continue to be available to you throughout the tournament. Note that there is NO in-person information meeting for Team Managers prior to the tournament.

## Watching Team Presentations

While there are so many fun activities happening at Global Finals, one of the most exciting events is the tournament itself! We encourage your team to watch as many Presentations as possible throughout the week. Watching other teams in the same Challenge helps to extend your team members' learning past their own solution, and watching teams in other Challenges can open their eyes to new and exciting ideas.

At registration, your team will receive several "Buddy Up" cards. We encourage your team to fill out these cards and exchange them with other teams you meet during the event. It's a great way for your team members to advertise their own solution, make new friends, and support other teams as they present!

## Behavior at the Event

Please take a few moments before your arrival to talk with your team about appropriate behavior during the event. Keep in mind, there will be people from all over the world in attendance, with many different backgrounds and cultures. To ensure an amazing experience for all participants, please remind your team to be respectful of others at all times.

## Health and Safety

Please take a few moments before your arrival to review the health and safety policies for Global Finals, found at <https://globalfinals.org/health-safety/>. This is where you will find the most up-to-date information for your time at Global Finals! Be sure to check this page often for any updates.

## Prop Storage

For all Challenges and competition levels, Prop Storage will be located in Bartle Hall on the 3<sup>rd</sup> floor of the KCCC. Each team will have a designated Prop Storage booth, organized by Challenge, for the entirety of the event. Booths for teams in the Engineering Challenge will be located in or near Exhibit Hall A. You will be notified of your specific booth number after April 25. Each booth will be a space that measures approximately 8ft x 8ft (2.44m x 2.44m) and will be identified with your booth number, Team Number, and Team Challenge time. We encourage your team to use this space as a place to display and work on props, meet as a team, or just hang out during the event!

"Garage" spaces will be located throughout Prop Storage and will be available for teams to work on elements of their Team Challenge solutions. Tables and electrical outlets will be available in these spaces. Your team should plan to bring any tools you need to work on your props. (See [Global Finals-Specific Restrictions](#) later in this letter for more information.) If you find that you are missing something, teams are usually happy to share tools or supplies, but please do not borrow equipment from other teams without their permission. Your team should plan to limit your time in the Garage to about 20 minutes each time you visit to make sure other teams are able to use this shared space as well.

There may be a limited number of carts and/or dollies available to help your team move from your vehicle to your Prop Storage Booth, if you are driving props. **If your team needs a cart or dolly to move props to and from the Presentation Site, you should plan to bring it with you to the event or find a way to carry all necessary items.** A limited number of dollies and carts will be available for free rental at the Convention Center on a first-come, first served basis. Those opting to rent will be required to leave a valid driver's license, credit card, and signed rental form, and will be charged \$600 for any unreturned cart.

**Please note that no one will be permitted in Prop Storage without credentials, which must be received by the Team Manager at registration in the Lower Exhibition Hall (Municipal Building).**

Keep in mind that you should always have your props in your possession or **inside** your Prop Storage booth. Unattended items left outside the Prop Storage booth (for example, in the Garages, hallways, or other areas of the convention center) might be considered abandoned and mistakenly disposed of by tournament staff and officials. Props **must not** be stored in the aisles between Prop Storage booths.

We want to maintain a safe atmosphere for participants, teams' props, and the building, so please ensure that your participants refrain from running, throwing, or roughhousing in Prop Storage.

**Prop Storage will be open to teams during the following hours:**

- Thursday: 1:00 p.m. – 9:00 p.m.
- Friday: 6:30 a.m. – 9:00 p.m.
- Saturday: 6:30 a.m. – 9:00 p.m.
- Sunday: 6:30 a.m. – 3:00 p.m.

**You MUST remove all team gear and props from the Prop Storage Area before 3:00 p.m. on Sunday.** Any remaining items will be sent to lost and found and/or disposed of after that time. If you suspect that an item has been sent to lost and found, you will need to call **816-513-5111** after 3:00 p.m. in order to retrieve your items. No one will be admitted into Bartle Hall after 3:00 p.m. on Sunday. For more information about lost and found, please visit <https://globalfinals.org/lost-found/>.

Be sure to visit <https://globalfinals.org/team-props/> for important information on shipping and driving props to the KCCC.

## **Practicing**

Your team may choose to practice your Challenge solution in your Prop Storage booth (as long as you do not take up more than your allotted space), the Garages in Prop Storage, the hotels, outside, or at some other location. Teams will **NOT** be allowed to practice at the actual Presentation Site. We want to make sure that we provide a level playing field and a safe environment for all teams and that we protect the Presentation Sites and equipment.

## Interference

Remember that rules of Interference for Team Challenges still apply! (See Section VI of Rules of the Road.) Appraisers and other tournament officials can and will deduct points for Interference in order to keep a level playing field for all teams.

Remember that **only team members** may:

- o Re-assemble or repair equipment or props.
- o Fix hair, costumes, or make-up.
- o Direct the team's Presentation during rehearsals.
- o Make suggestions about ANY part of the team's solution, including the Presentation or how to move props into the Presentation Area.

Parents, supporters, and Team Managers may assist the team with physically carrying props and equipment from Prop Storage to the Pre-Prep Area and Prep Area, and from the Prep Area to the Launch Area. They **must not** help move props from the Launch Area into the Presentation Area after time begins. Destination Imagination has created a [short video](#) about Interference for you to share with your team members' parents and supporters.

## Online Forms

Please note that your team must complete and submit your Tournament Data Form, Expense Report, Team Challenge Prep Checklist, and Instant Challenge Prep Checklist through the Resource Area. See the Tournament Guide for Teams, found in the Documents section of the Resource Area, for a step-by-step guide on completing the online forms.

It is highly recommended that your team print 1 copy of the Tournament Data Form, Expense Report, Team Challenge Prep Checklist, and Instant Challenge Prep Checklist as a backup in case of any issues during the tournament.

**Keep it brief!** The Tournament Data Form is meant to help the Appraisers quickly learn what they need to watch for in your Presentation. The details can be explained further after the Presentation, while the team talks to the Appraisers. They are really interested and want to know about your team's solution, but the tournament schedule doesn't allow time to read long descriptions on the Tournament Data Form. Be sure your team's descriptions stay within the character limits set in the online forms.

Be sure to review all entries on your team's Expense Report for accuracy. The Appraisal Teams will be reviewing all Expense Reports closely to ensure a level playing field. If your team has any receipts for items you purchased for your solution, you must attach an image or PDF of each receipt in the Expense Report.

Additionally, prior to the tournament, your team should review your team's identification information, including team name, Team Number, organization, and school. You can review this information and make any edits by visiting the Resource Area and selecting Teams -> edit teams on the Events page. Destination Imagination will use the information on this page when displaying Awards during the Closing Celebration at Global Finals.

## Pre-Tournament Check

Your team is strongly encouraged to participate in the Global Finals Pre-Tournament Check. If you choose to participate in the Pre-Tournament Check, your team's online forms will be checked by a Virtual Prep-Appraiser. **Your team must submit all online forms by 11:59 p.m. on Thursday, May 1, 2025 in order to participate in the Pre-Tournament Check.** After reviewing your team's forms, the Virtual Prep Appraiser will change your team's status to either "resubmit" (if changes are needed) or "pre-checked" (to indicate that your submission is ready to be reviewed by the Prep Area Appraiser on site). The Virtual Prep Appraiser is not required to follow up with your team after sending initial feedback to the Team Manager of record, but they will be monitoring the system. So, if you have questions about the feedback, your Team Manager may contact the Virtual Prep Appraiser through the Resource Area Messaging System to ask for clarification.

If your team met the Pre-Tournament Check deadline, you will receive feedback from the Virtual Prep Appraiser on or before Thursday, May 8, 2025.

Whether or not your team chooses to participate in the Pre-Tournament Check, your online forms will be reviewed by the Prep Area Appraiser just prior to your Team Challenge Presentation at the tournament. Keep in mind that the Prep Area Appraiser may identify issues that were not addressed during the Pre-Tournament Check. This is because it may be impossible for the Pre-Tournament Prep Appraiser to identify all issues without seeing elements of your team's solution in person.

If your team chooses not to participate in the Pre-Tournament Check, all of your online forms must be completed and submitted prior to meeting the Pre-Prep Appraiser in the Pre-Prep Area prior to your Team Challenge Presentation time. Keep in mind that by not participating in the Pre-Tournament Check, if major issues are identified on site, the tournament schedule cannot be delayed for your team to make any necessary changes. Your team will be given time only as the tournament schedule allows.

## Tournament Flow

If your team is moving props from Prop Storage, approximately 60-90 minutes before your Presentation time, your team should begin moving everything you need to the Engineering Challenge elevator and escalators. **Note that Prop Storage Officials will NOT inform your team when it is time to begin moving your props. Whether you are moving from Prop Storage or directly moving props from your vehicle, your team is responsible for getting to the Pre-Prep Area on time, approximately 50 minutes before your Presentation time.** (See below for more information on the Pre-Prep Area.) You should use the escalators located in Exhibit Halls A. The elevator for the Engineering Challenge is also in Exhibit Hall A, close to the escalator on the east side of the building.

Smaller items may be transported using the escalators if there are no safety issues. Your team should make every attempt to pack props safely so that as many items as possible can be transported down the escalators, since other teams will also be needing to use the elevators during this time. Larger/unsafe props will be directed to the Engineering Challenge elevator. Your team should be prepared to fit your props into an elevator that measures 83in x 60in, with a height of 90in (2.1m x 1.5m, with a height of 2.3m). **Please note that it may not be possible for your team to use the elevator outside of your designated move time.**

Approximately 60 minutes before your scheduled Presentation time, one or two team members who will be able to explain the design and construction of the Transporter and weights must bring the Transporter and weights in a team-supplied storage container to the Engineering Check-In Area, which will be in 2101 for all teams. One Team Manager may accompany the team to the Check-In Area. Please do not check in earlier than one hour before your Presentation time. Anyone not participating in the Check-In process should continue to move your props toward the Pre-Prep Area.

If your Transporter and/or weights do not pass Check-In, there will be space in the Check-In Area for adjustments or repairs to be made. Please keep in mind that you must present at your scheduled Presentation Time and your team must complete the Check-In process prior to your Presentation. You may wish to bring extra materials and equipment to Check-In in case you need to make adjustments. When the Check-In process has been completed, your team must leave your sealed container with your Transporter and weights in the Check-In Area until it is time to move to the Prep Area, approximately 20 minutes prior to your Presentation. After completing the Check-In process, the team members and Team Manager may rejoin the team and help to move props.

Approximately 50 minutes before your Presentation, you should begin moving all props down the escalators and elevators and into the Pre-Prep Area. (The Pre-Prep Area will be clearly marked for your Challenge and level and will be close to your Presentation Site. This is a place where your team can place your props while you are moving them from the Exhibit Hall to the 2<sup>nd</sup> floor.) The Pre-Prep Area Appraiser will check to make sure all of your team's required forms are complete.

Approximately 30 minutes before your Presentation, your team will move from the Pre-Prep Area to the Prep Area to complete the check in process. It is recommended that your Team Manager brings a device on which they are able to access the Resource Area in case it is necessary to make changes to your online forms during your time in the Prep Area. The Prep Area Appraiser will also have a device on which they can make changes for your team if the Team Manager is unable to use their own device. Once you have arrived at the Prep Area, 1-2 team members should return to the Check-In Area to retrieve the sealed container and bring it back to the Prep Area. The team must NOT break the seal on the container until the Prep Appraiser instructs your team to do so.

### **Team Challenge Presentation Site Information**

- The Engineering Challenge Presentation Site will be on the second floor of the Kansas City Convention Center.
- As per Section IX.A.4 of Rules of the Road, all props should fit through a standard door, measuring 30in x 76in (0.76m x 1.93m). There will be a doorway into the Presentation Site.
- The Launch Area will be located on one side of the Presentation Area. It will be marked with tape.
- The Presentation Areas have high ceilings and short-napped carpet. There are no restrictions on the area team members may use to present.
- As noted in the Challenge, a single 3-prong electrical outlet will be provided at the edge of the Presentation Area for your team's use. This outlet will be at the end of an extension cord, which may be taped to the floor. The team may move the extension cord, as long as the extension cord does not come unplugged and any tape used to keep the extension cord in place is not moved.
- While Presentation Sites are separated by walls, some noise from other nearby sites may be heard. Team members should be prepared to speak loudly in order for the Appraisers and audience to hear them.
- The Appraisers may move around the Presentation Area during the team's Presentation so they can see and hear the teams.

- The lights in the Presentation Site cannot be turned off or dimmed.
- Teams will not have additional time in the Launch Area to assemble or organize props.
- Microphones will **not** be provided for any team.

### **After the Team Challenge Presentation**

Due to the number of teams and time constraints, staged pictures cannot be taken of the team in the Presentation Area. At the conclusion of your team's Presentation, the team will take a bow and the Appraisal Team will talk to the team members for a few minutes. The Team Manager, parents, and supporters should remain with the audience until the Timekeeper/Announcer invites them to assist the team with clean up and removal of the team's Challenge solution.

At that time, your team members and your team's supporters may move your props back to vehicles, to the dumpster, and/or back to Bartle Hall, using the same elevators and escalators as before. Your team is encouraged to bring your props back to your booth to continue to display them for the rest of the event. See below for more information about disposing of Team Challenge props.

After all props have been stored or disposed of, you may return to your Team Challenge Presentation Site to inquire about your Raw Scores. Most Raw Scores will be ready within about 30 minutes, but please understand that it may take more time if the site is running behind. One team member and one Team Manager may meet with the Head Appraiser to discuss Raw Scores and sticky note feedback. The Head Appraiser will go over your team's Raw Scores and sticky note feedback in a digital format. Note that you will NOT receive a paper copy of your Raw Scores or sticky note feedback. Once you have discussed all of your Raw Scores and feedback, the Head Appraiser will send them to the Team Manager of record via email. **Your team will have 30 minutes from the receipt of the email to return to the Head Appraiser with any questions or concerns.**

Below, you will find a diagram of your team's flow from the beginning to the end of your Team Challenge experience, starting with Team Challenge Pre-Prep and ending after your team exits the Team Challenge Presentation Site. For more information on Tournament Flow, please visit <https://www.globalfinals.org/tournament-flow/>.

Note that Instant Challenge will be completed separately from Team Challenge for Global Finals 2025. Please see the Instant Challenge Team Manager Letter (found at <https://www.globalfinals.org/team-manager-info/>) for more information on Instant Challenge.

# Elementary, Secondary, and University Level Site Flow

# Middle Level Site Flow

## Disposing of Team Challenge Props

Dumpsters will be available at the North Dock and South Dock in Bartle Hall starting Thursday, May 22 at 2:00 p.m. Due to safety concerns, an adult must accompany all teams to the dumpster area. Teams will not be allowed to climb into the dumpsters.

If your team will be driving props home, be sure to keep the car placard received at registration. This placard will be required to access the dock if you need to load-out props. Vehicles that are picking up team props after the Presentation must meet the team at the **South Dock**.

If your team is planning to ship props home, please make sure to visit the Viper service desk in Prop Storage, near the West Dock in Exhibit Hall D, for more information.

Before you leave, be sure to double check Prop Storage and the Presentation Site to ensure your team has cleaned up and removed all of your items, tools, repair kits, etc. **Anything left in Bartle Hall after 3:00 p.m. on Sunday, May 25 will be sent to lost and found and/or disposed of by staff.**

## General Safety at the Team Challenge Presentation Site

Destination Imagination is committed to providing a safe environment for those presenting, appraising, and watching at the Presentation Sites. To that end:

- Safety is a serious concern.
  - Adults CAN stop teams from doing something they feel is unsafe.
  - For safety concerns related to the Team Challenge solution, adults CANNOT fix the problem or tell the team how to make the solution safe.
- Prep Area Appraisers will make sure the team's equipment and other props do not pose a safety hazard to the team, Appraisers, audience, or Presentation Site.
- Appraisers will stop any portion of the team's Presentation they feel is unsafe or may cause damage to the Presentation Site. The team will not be given additional time if this happens.
- Any team using lubricants, water, or other liquids should be aware that deductions may apply if the team leaves any marks, damage, spills, stains, or slippery spots.
- Masking will be optional at Global Finals 2025
  - If a mask is not decorated with any additional materials, your team may list the mask as exempt on the Expense Report, whether or not the mask contributes to your team's solution.
  - Improvisational Challenge teams wearing masks during the Presentation must not decorate the masks in any way. The mask must not contribute to your team's Presentation.
  - If a mask is decorated with additional materials, your team must list the value of the decorative materials on the Expense Report. Decorative materials are NOT exempt from cost.
  - Should your team opt to wear masks during your Presentation, your team should practice good enunciation and projection as you prepare for Global Finals 2025. Keep in mind that the Appraisers will still need to hear and understand everything your team is saying in order to award all the points your team earns for your solution. It is not Interference for your team to get feedback from non-team members about your team's enunciation and projection effectiveness due to mask wearing. Keep in mind that non-team members must not offer ideas or suggestions about your Challenge solution and must follow all other rules of Interference.

## Global Finals-Specific Restrictions

The following materials are allowed to be used in Team Challenge solutions:

- Dry ice, as long as it is handled and disposed of properly.
- Helium balloons, as long as they are under the team's control at all times.
- Latex, except when prohibited by the Challenge.
- Glue, with the exception of spray adhesives, which are not allowed. Floor protection/coverings must be used when using glue in the Convention Center.
- X-acto knives, retractable blades, etc. Floor protection/coverings must be used when using X-acto knives, retractable blades, etc. in the Convention Center. Teams are responsible for providing these floor coverings.
- Safe chemical reactions. If a team plans to use a chemical reaction in its Presentation, the team must provide SDS forms for the chemicals (including for household chemicals and ingredients). The team members must be able to explain how they will keep themselves, the Appraisers, and the audience safe AND how they will clean up the Presentation Site if there are spills. All chemical reactions must be contained so that tournament floors remain clean and undamaged. Alcoholic beverages are not allowed in the Convention Center for chemical reactions during the Team Challenge Presentation or for any other reason.

In the Convention Center, the team **MUST NOT:**

- Spray commercial spray paint, aerosol-propelled paint, or spray adhesive, due to harmful fumes and the potential drifting of the paint in the air (Rules of the Road, VII.J.6). In addition, the team must NOT use spray paint or spray adhesives on city streets/sidewalks.
- Apply or spread any small or fine-grained substances. This includes, but is not limited to, glitter, cat litter, sand, and other materials specifically mentioned in Rules of the Road Section VII.J.8. **The team must ensure that any small or fine-grained substances used on elements of the solution are securely applied before entering the Convention Center.**
- Damage any part of the Kansas City Convention Center, including the floors. **If damage occurs, the team will be held responsible.**

## Prop Storage and Garage Restrictions

"Garage" spaces will be located throughout Prop Storage and will be available for teams to work on elements of their Team Challenge solutions. The following restrictions apply to Prop Storage and the Garages:

- All chemical reaction preparations and tests must take place within the Garages.
- Paint must only be applied in the Garages. No spray or aerosol paint is allowed.
- Battery-powered tools may be used in the team's Prop Storage booth. All other power tools must only be used in the Garages, which will have electrical outlets available for the team's use. Power saws of any type are not allowed in the Convention Center.

## Overlooked Requirements of the Challenge

After viewing a number of solutions to the Challenge at Regional and Affiliate Tournaments, we have found that some teams have overlooked some of the requirements in the Challenge. Please keep the following in mind:

- 1-2 team members (and one Team Manager, if the team wishes) should bring your Transporter, weights and a team-provided container to the Check-In Area 1 hour prior to your scheduled Presentation time. Make sure to bring a container that can be fully sealed with the Transporter and all weights inside. All team members do not need to go to the Check-In Area.
- The Transporter, which includes the Propulsion System, must be a single device. This means that all parts of the Propulsion System must be part of the Transporter and must not come apart during a Weight Transport Test. (See Section I.F.4.) Remote controls or external propulsion/guidance systems, whether attached or unattached, will not meet this requirement. (See Section I.B.2.)
- Each weight must be clearly numbered 1-10. This should be easy to read and have enough contrast from the color of the weights so that the Appraisers can easily determine which weights will be used during each Weight Transport Test. (See Section I.B.7.)
- The weights must not be any part of the Transporter, including the Propulsion System. (See Section I.B.10.)
- The Appraisers may recall the Transporter and/or weights after your team's Presentation to verify that all requirements were met. The Appraisers may choose to reweigh the Transporter and/or weights at this time. The Transporter and weights will be returned to your team. (See Section I.C.13.)
- All unused weights must be placed in a designated Weight Area. This will be clearly identified and close to the Weight Transport Test Course.
- A Weight Transport Test begins when the first place the Transporter touches the cord crosses the Start Line. The Transporter must use its Propulsion System to move from behind the Start Line to across the Finish Line while carrying the weights. (See Section I.E.7.)
- Your team may attempt as many Weight Transport Tests as you choose during the 8-minute Presentation. (See Section I.I.5.) Your team may use the entire 8-minute Presentation time for Weight Transport Tests, regardless of whether or not your team has ended your Presentation.
- The Official Weight Transported will be calculated by adding together the weight of each weight transported during a single successful Weight Transport Test. (See Sections I.E and I.F.1.)
- Your team must follow all safety guidelines from Rules of the Road when presenting the Daring Display. (See Rules of the Road, Safety Guidelines and Restrictions.) The Appraisers reserve the right to stop any activity that they feel is unsafe during your Presentation.
- All team members must wear shoes or foot coverings with reasonably impenetrable soles at all times during a tournament. This is to protect team members from any undetected debris that may be on the floor. A team member who loses or removes a foot covering during the Presentation may continue their portion of the Presentation only after the foot covering is replaced. (See Rules of the Road, Section VII.J.1.) This includes during the Daring Display. Team members who are placing the Transporter and/or weight(s) must wear closed-toe shoes. (See Section I.E.16.)
- Your team **MUST NOT** involve the audience or the Appraisal Team in your Presentation in any Team Challenge. During your Presentation, audience members must not signal or communicate with your team in any way. However, if a member of the audience, who is not a Team Manager, spontaneously interferes through no fault of the team, the team will not receive a deduction. It is fine for the audience to naturally applaud during your Presentation.

However, the team must not actively solicit an audience response or encourage audience participation. (See Rules of the Road, Sections VII.B.3-VII.B.4.)

- A tournament-provided Weight Transport Test Course will be set up in the Presentation Area. All Weight Transport Tests must be conducted using this Weight Transport Test Course. See the images below for photos of the Global Finals Weight Transport Test Course.

We hope you have a wonderful tournament!
